

# ***Don't let the Grand Jury jail anti-war and international solidarity activists!***

On Sep. 24, the FBI raided anti-war and international solidarity activists in Minneapolis and Chicago, then subpoenaed 14 people to appear before a Grand Jury investigating "material support of terrorism." The 14 activists were ordered to bring information with them on all their political contacts & activities here and around the world.

This is an outrageous attack on the right of free speech and association! Naming names of activists they've met from places like Colombia and Palestine could jeopardize those activists' safety at the hands of their oppressive governments.

The people subpoenaed have not materially supported terrorism. All 'pled the 5th' so the government temporarily suspended their subpoenas. Now US Attorney Fitzgerald's office says three of the activists—Anh Pham, Tracy Molm and Sarah Martin—will soon have their subpoenas reactivated. They'll face the choice of participating in the witch hunt or going to jail indefinitely for 'contempt'. This must be stopped. Join us to demand that President Obama and Attorney General Holder ***stop US Attorney Fitzgerald's McCarthyist witch hunt.***
